

Mobile ANPR Application

The TES Mobile ANPR application is installed on a phone or handheld computer and enables Civil Enforcement Officers to detect potential contraventions and process vehicle details using hand held ANPR.

The TES Mobile ANPR app reads the number plate of a vehicle and checks to see if it is on an authorised list, (e.g. residents parking permits / cashless Payment) if the vehicle registration is not found it is then flagged as a potential contravention that requires further investigation.

Key Features

- Instantly deployable mobile ANPR enforcement device.
- Check parked vehicle number plate details in awkward or confined locations.
- Full integration with other TES systems (e.g. Compliance Display Map).
- Easy integration with most major cashless systems and permitted whitelist databases, virtual permits etc.
- Intuitive interface allows users to quickly scan number plates

Key Benefits

- Extends the service provided by existing CCTV / ANPR vehicles.
- Increases the effectiveness and efficiency of mobile enforcement operations.

Technical Requirements

- A smart mobile phone running Windows Phone 8.1.
- Mobile internet connection 3G/4G, Wi-Fi.
- Access to Port 80 / HTTPS
