

TwizyTES

The TwizyTES is a compact mobile ANPR enforcement platform designed for Spotter Mode™ that can be used on street or in car parks where the larger CCTV vehicles cannot be easily or safely be deployed.

The ANPR system alerts the Civil Enforcement Officer / Rider when it spots a vehicle in potential contravention. The Civil Enforcement Officer / Rider then can safely stop the bike and process the contravention or the details can be sent automatically on to another Civil Enforcement Officer for action.

Key Benefits

- On board ANPR system makes Civil Enforcement Officer's more efficient so that they can enforce larger CPZ areas than they could on foot.
- Decreases contravention detection times.
- Operates on street and in car parks.
- The Civil Enforcement Officer on the Twizy can process the detected contraventions or the details can be sent via CDM on to another Civil Enforcement Officer for action.
- Fixed price long term rental agreements available for CCTV Vehicles and Equipment (includes maintenance and support).
- Remote support directly to TwizyTES via 3G/4G.

Key Features

- Compact electric vehicle with zero emissions.
- Automatic CPZ enforcement in Spotter Mode™ using ANPR and GPS.
- White lists for authorised vehicles, black lists for Wanted vehicles or persistent evaders.
- Patrol zones that are Permit, Pay & Display or Cashless parking controlled. Using GPS, the ANPR software automatically polls authorised vehicle lists as it approaches a controlled parking zone. Any potential contraventions are flagged up to the rider via an audible alert and can also be sent to the nearest CEO.
- Full integration with the Compliance Display Map.
