

TES Permit

TES Permit is a cloud based Virtual Permit System that can be used to provide any type of parking permit on line. End users simply open an account on line and can manage their permits from their Desktop or via their Smart Phone using an app over the web. The system is fully integrated with existing TES products and can be integrated with other existing Car Parking Systems.

Key Benefits

- Users apply online, authorisation is made via the back-office by council staff plus automatic authorisation / multiple automated checks with other systems can also be configured.
- Authorised users pay for their permit online, without having to apply in person.
- Users may change vehicle registration numbers or obtain temporary car permits via their online account.
- The system will send multiple notifications about the expiry of permits and visitor vouchers.
- Fully configurable back office software, fully integrated with TES ANPR bikes and Cars and the TAIS application.
- Application can be branded to the client's corporate colours / logo.

Key Features

- Ease of use, customers open an online account which they can manage online from their PC or smart phone via dedicated App.
- Paperless permits allow big savings on administration and printing costs.
- Fully configurable cloud based back office system admin staff can update letter templates, email templates, pricing online.
- Virtual visitor voucher book option managed via the Android and iOS app.
- Multiple notification of expiry of the permit on email and on mobile App.
