

The TES Review Client enables a comprehensive review of video evidence prior to issue of a notice with the ability to integrate with most back-office systems.

The application allows timestamps and evidence packs downloaded from a CCTV/ANPR vehicle or TES Fixed Cameras to be reviewed and authorised prior to being sent to the notice processing system to initiate the issue of a PCN (Penalty Charge Notice).

Key Features

- Multiple users with individual logins.
- Multi-factor authentication option.
- Automatically or manually upload and review Attended and Unattended video evidence from TES Enforcement Vehicles.
- Automatically upload and review Unattended evidence packs from TES Small Blue camera systems.
- All contravention and location details automatically populated for TES Small Blue Camera Systems.
- Optional automatic look up to check VRM, Make, Colour etc.
- Evidence can be filtered by time, date, month and year.
- Search by VRM or unique ID.
- Select still images for inclusion on PCN. Unattended predefined images, can be set automatically for each potential contravention.
- Ability to crop video footage as required whilst retaining original data.
- Automatic second check of camera white lists prior to PCN issue.
- Camera suspension schedule tool.
- Standard report generator.
- Full audit trail maintained.

Key Benefits

- Full integration with TES Small Blue Cameras, Enforcement Vehicles and Attended Capture Terminals.
- Improved efficiency with the ability to upload, assign, review and issue a PCN all in one package.
- Manage whitelists and camera suspensions.
- Interfaces with most major Notice Processing Systems on the market.
- VCA Manufacturers Approved.
